

RUBY™

RUBY™ Handheld Video Magnifier

RUBY at a Glance

- 4-inch high resolution LCD display
- Lightweight design - 7.7 oz (218g)
- 5 viewing modes
- Freeze frame
- Folding handle
- 2 hours continuous use
- Use rechargeable or disposable batteries

For the many people who need help reading text and seeing details because of low vision, traditional magnifying glasses work only up to a point. The RUBY™ video magnifier takes handheld magnification to the next level and beyond. The RUBY's 4-inch full color, high brightness video screen makes it outstanding for reading bills and writing letters and checks. It is so small and unobtrusive that it easily slips into a pocket or purse as the perfect traveling companion for visiting the grocery store, the pharmacy, the bank, the library, bookstore, restaurant, or anywhere else.

The RUBY is easy to use for those who are unfamiliar with technology products. Just turn it on with one button, place it over an object, and adjust enlargement to your preference with the easy zoom button. The unit stays flat on the table, and the magnified image appears in the display window. With only one button, you can adjust the screen from full color for viewing pictures to any of four high contrast text modes.
